

# OUTLOOK FOR CONSTRUCTION IN THE BALTICS

December 2023

The report contains economic analysis and general indicators (GDP development, inflation and unemployment etc.) and deep analysis of construction by sectors. Countries are processed individually. The forecast period is 2020-2026.

The report includes the following Euroconstruct tables:

- Main demographic and economic indicators.
- Value of construction by sectors and their %-change
- Residential construction (dwellings) in real terms and forecast.
- GDP by expenditure approach and %-change.

The material includes approx. 35 pages of tables and text. Available as a PDF file and the key tables in .xlsx format upon request. The report will be updated every six months, June and December.

Price: PDF file by e-mail 650 EUR + VAT.

The invoice will be send after the delivery and shall be paid within 14 days of date of invoice.
